

Application No. 10/687,503  
Art Unit: 3721  
Office Action dated: February 24, 2005

### REMARKS

Claims 1, 10 and 22 have been amended to recite the "firing member" as the "firing bar", as per the Examiner's suggestion. Accordingly, no new matter is involved. Claims 1, 10 and 22 have been amended to recite the limitations of claims 2 and/or 11, and claims 2 and 11 have been cancelled herein. Accordingly, no new matter is involved.

In the previous office action, claims 1-22 were rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Specifically, the Examiner stated:

"Claims 1, 10 and 22 recite the phrase "said firing bar" in lines 7, 8 and 11 of claim 1, lines 8-10 and 13 in claim 10, and lines 7.8.11.13 and 14 of claim 22. There is insufficient antecedent basis for these limitations in the claims. The remainder of the claims, excluding claims 8, 16 and 21, also recite the phrase "said firing bar", which is improper. Perhaps changing the phrase "a firing member" in line 5 of claim 1, line 6 of claim 10, and line 5 of claims 22 to read "a firing bar" would correct the problem."

As noted above Claims 1, 10 and 22 have been amended to recite the "firing member" as the "firing bar", as per the Examiner's suggestion. Therefore, it is respectfully requested that the Examiner withdraw the 35 U.S.C. 112 rejections to Applicants claims.

In the previous office action, the Examiner rejected Claims 1, 9, 10, 14, 20 and 22 under 35 U.S.C. 103(a) as being unpatentable over Milliman et al. (USPN 6,669,073) in view of Geiste et al. (USPN 6,202,914). However, the Examiner also indicated that claims 2-8, 11-13, 15-19 and 21 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2<sup>nd</sup> paragraph, set forth in the Office action and to include all of the limitations of the base claim and any intervening claims.

As noted above claims 1, 10 and 22 have been amended to recite the limitations of claims 2 and/or 11, and claims 2 and 11 have been cancelled herein. Therefore, Applicants submit that all pending claims are now fully allowable over the prior art cited by the

Respectfully submitted,

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

*Claim Rejections - 35 USC § 112*

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:  

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
2. Claims 1-22 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1, 10 and 22 recite the phrase "said firing bar" in lines 7, 8 and 11 of claim 1, lines 8-10 and 13 in claim 10, and lines 7, 8, 11, 13 and 14 of claim 22. There is insufficient antecedent basis for these limitations in the claims. The remainder of the claims, excluding claims 8, 16 and 21, also recite the phrase "said firing bar", which is improper. Perhaps changing the phrase "a firing member" in line 5 of claim 1, line 6 of claim 10, and line 5 of claims 22 to read "a firing bar" would correct the problem.

*Claim Rejections - 35 USC § 103*

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:  

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.
4. Claims 1, 9, 10, 14, 20 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Milliman et al. (USPN 6,669,073) in view of Geiste et al. (USPN 6,202,914). ✓✓  

In reference to claims 1, 9, 10, 14, 20 and 22 Milliman et al. discloses a surgical stapling instrument comprising: a cartridge (220) containing a wedge member (234), the wedge member

(234) moveable longitudinally within the cartridge (220) to eject said staples from the cartridge (220); an elongate channel (216); a firing member (212) having a sharp edge (280), a support member (285) interacting with the elongate channel (216; figure 45), and cooperatively engagable with the wedge member (234; column 13 lines 5-8)) and longitudinally moveable in a distal direction; and a locking mechanism (288). The locking mechanism of Millimane et al prevents distal movement of the firing member (212), although it is not biased by the wedge member (234).

Geiste et al. discloses a surgical stapling instrument comprising: a cartridge (22) containing a wedge member (134); an elongate channel (114) having a reception feature (figures 13 & 13A); a firing member (144) including a sharp edge for cutting; a locking mechanism (120) for preventing distal movement of the firing bar (144) after the firing member (144) has been moved proximally a predetermined distance, wherein the wedge member (134) biases the firing member (144) into an unlocked (column 7 lines 10-18) and wherein the (134) wedge. It would have been obvious to one having ordinary skill in the art at the time of the invention to modify the firing member of Milliman et al. to include the locking mechanism of Geiste et al. for the purpose of preventing reactuation of the instrument after it has been actuated.

*Allowable Subject Matter*

5. Claims 2-8, 11-13, 15-19 and 21 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
